

# BUCK ROGERS

## IN THE 25<sup>TH</sup> CENTURY

### ADVANCED THUNDERFIGHTER DEVELOPMENT PROJECT

## QUAD / 4-SEATED VERSION

1/32 scale

Original starfighter paper model created by Martin Saenger.

Modified and additional parts created and (re-)textured by  
Marcell "Revell-Fan" von dem Berge.

Canopy pattern inspired by schematics by Alain Sinclair.

Test building and creative support by Chris "Rhaven Blaack" Tucker.

Buck Rogers © and ™ Universal City Studios and Robert C. Dille.

No commercial use. No infringement intended.

To Martin,

one of the greatest paper artists in the world.  
Thank you very, very much and keep up the good work!

This package gives you the parts necessary to build the four-seated version of the traditional Thunderfighter (first appearance in episodes 3 & 4 "Planet Of The Slave Girls"). Equipped with an XXL-cockpit it supplies room for two more passengers (+/- 1 Ambuquad). Even though its weapon systems are equal to its sleeker companion this variant is mainly used for transportation rather than for combat.

### **IMPORTANT:**

This package contains parts to build several versions of the quad. If you would like to build the small filming miniature quad, use the original parts 54 - 56 (slim fuselage). If you would like to build the life-size mock-up quad or the quad with cockpit interior, use parts 54 - 56 from this package (broad fuselage). In addition, you may attach your own colour stripe to create your own customized quad. The original filming miniature featured the green stripe. The blue quad (mock-up) from the episode "Twiki Is Missing" and the quad mock-ups aboard the Searcher (season 2) do not feature a colour stripe.

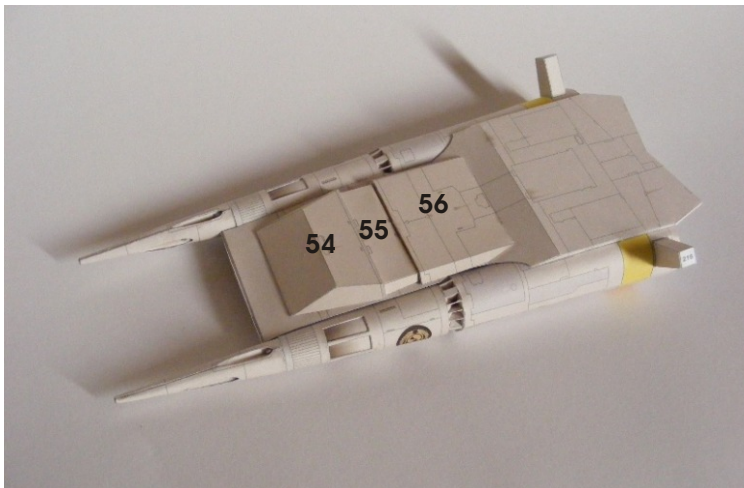

### **Assembly:**

1. Follow the original assembly instructions and build the model to the stage shown in the pictures below. Use parts 37, 49, 54 - 56, 245, 246 & 248 from this package. You don't need parts 38 - 43, 186 - 202 & 244.

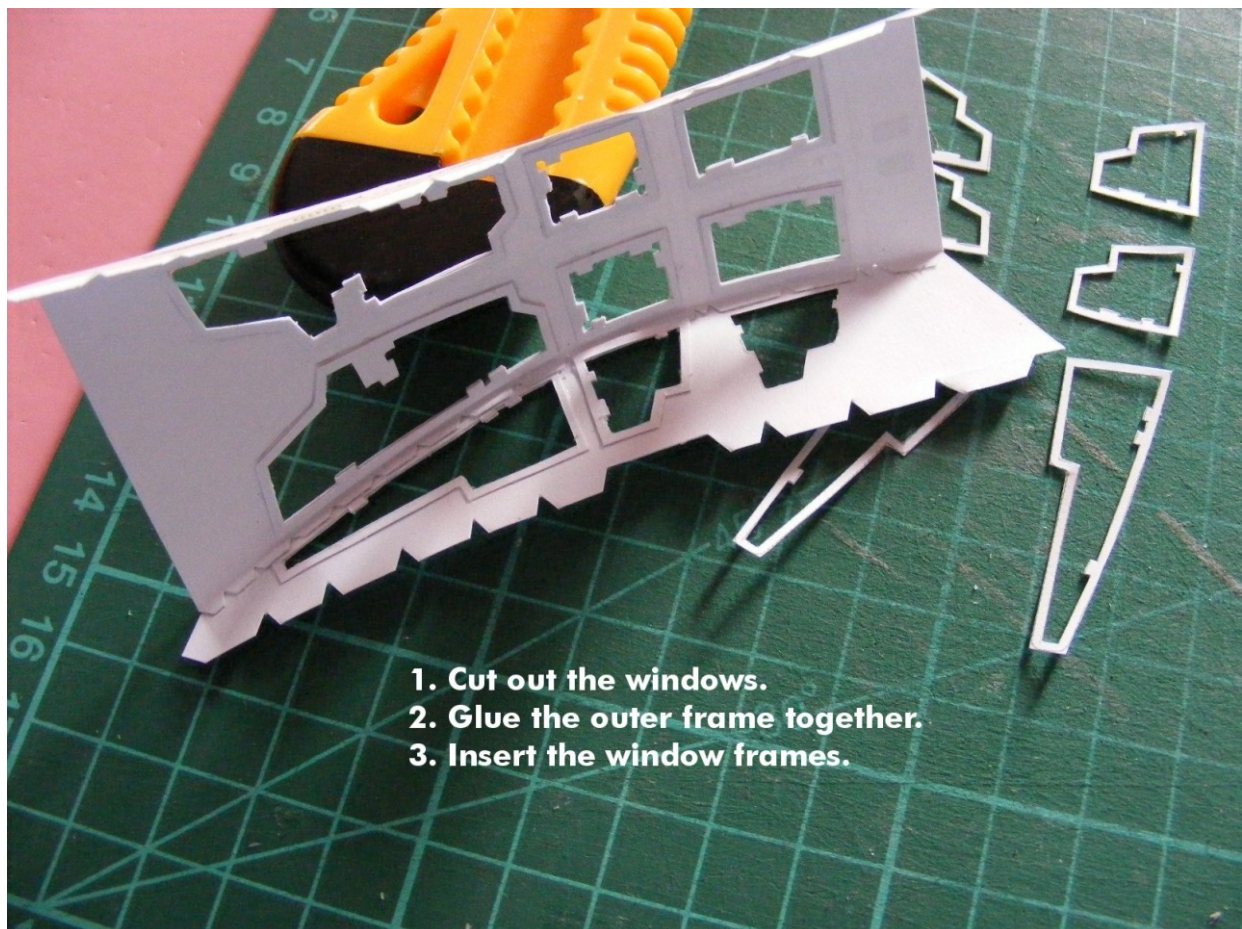

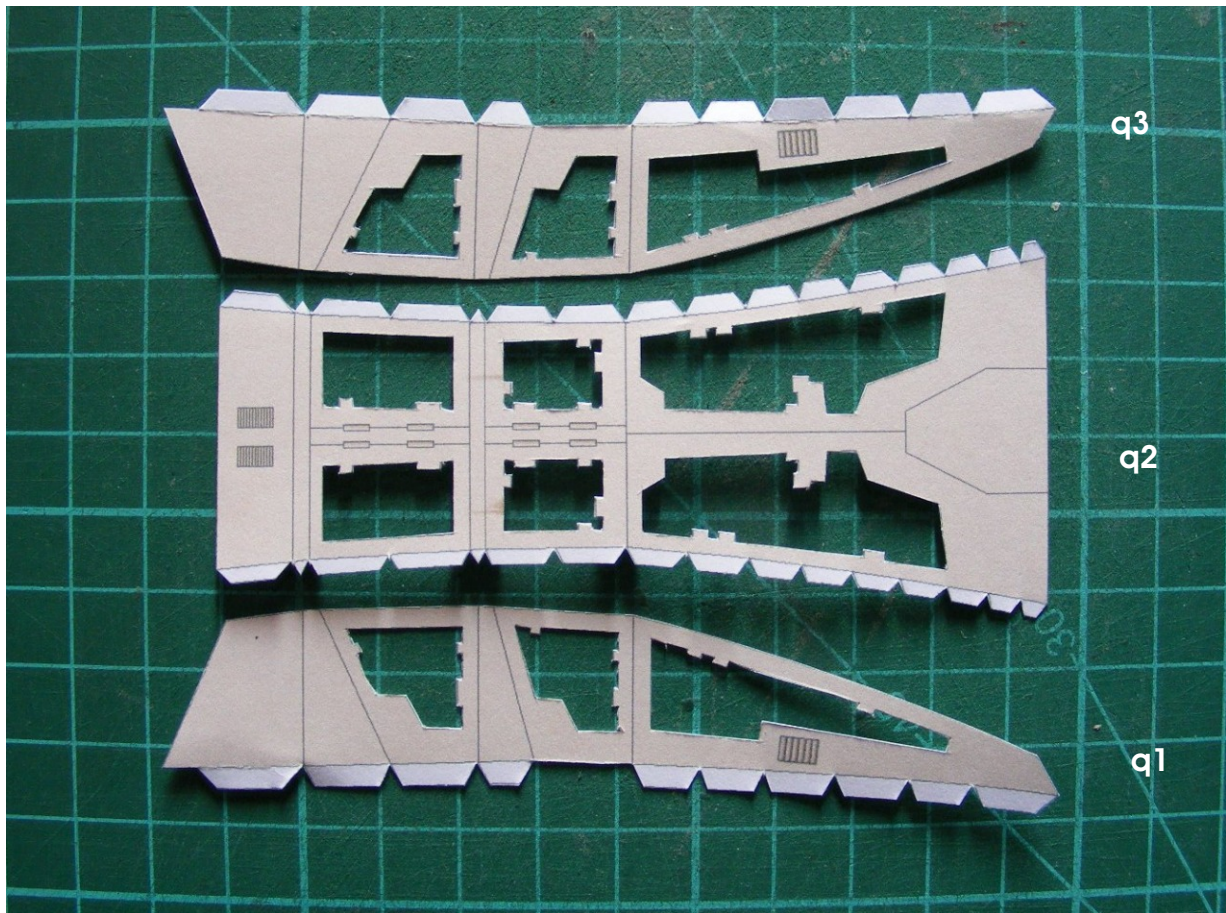

2. Follow the build pictures.

Use the blue parts 224 - 227, 178 and 182 if you would like to build the quad seen in the episode "Twiki Is Missing" ("TwIM" quad).

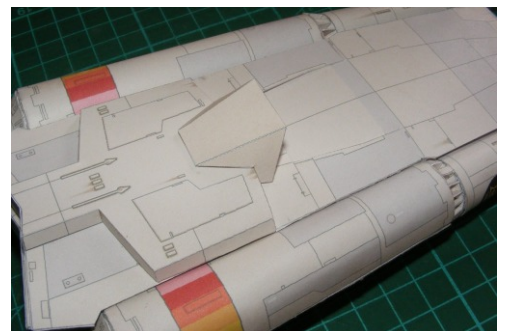

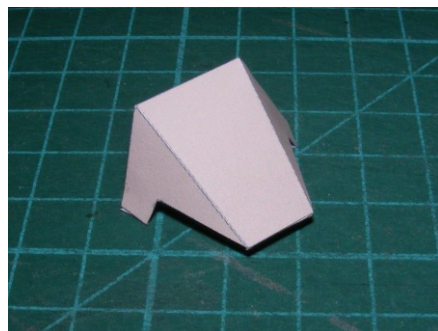

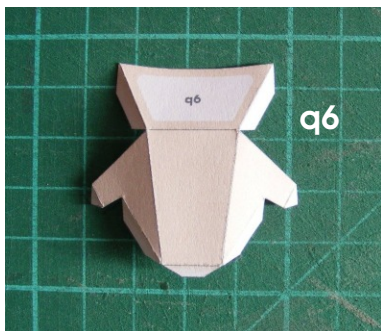

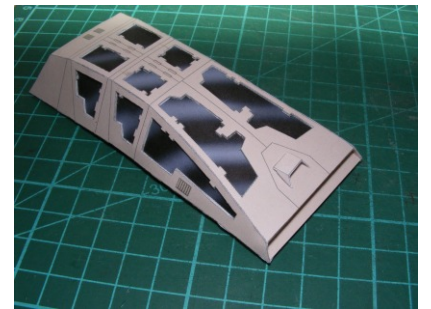

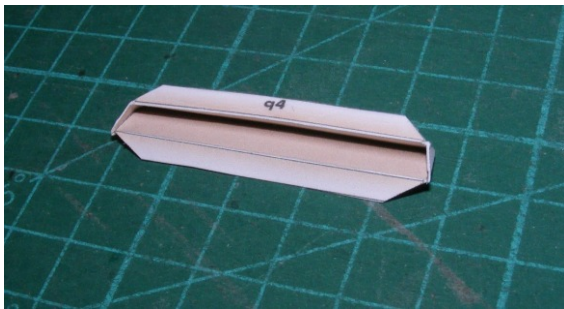

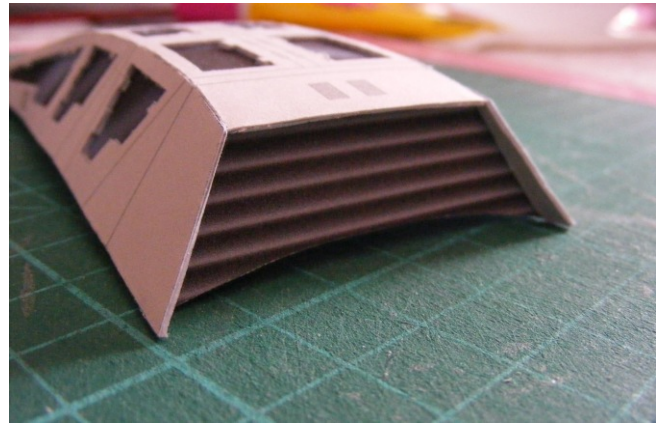

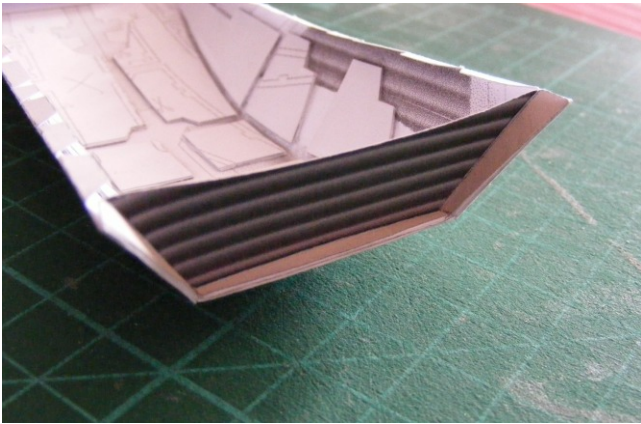

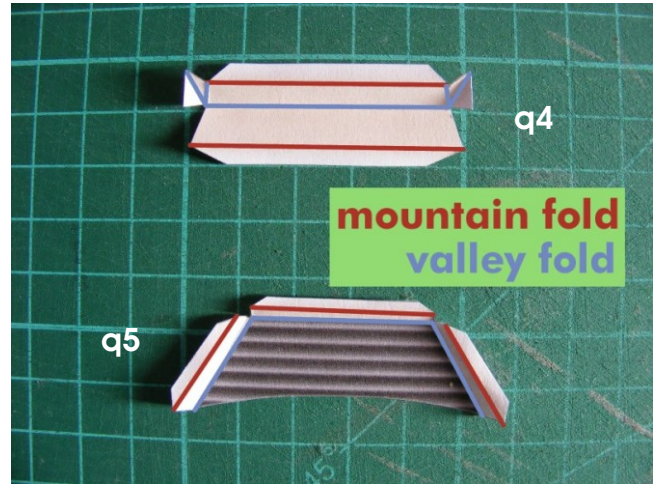

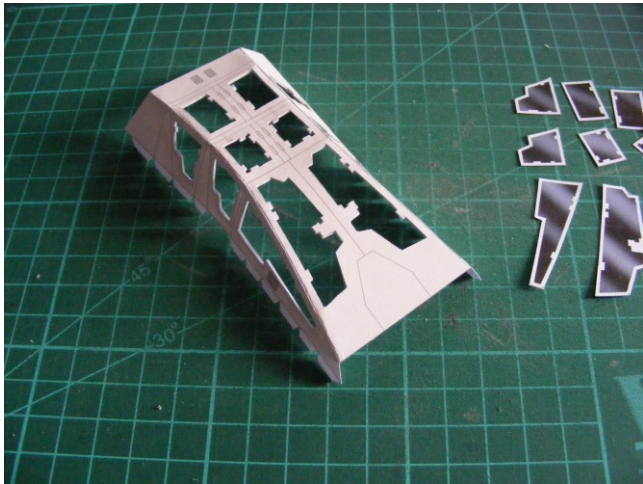

Cutting out the windows and frames is the most difficult step. Take your time, work very carefully and use a very sharp knife / cutter / scalpel. Ensure that your working place is well lit. And don't break your fingers ;-) !

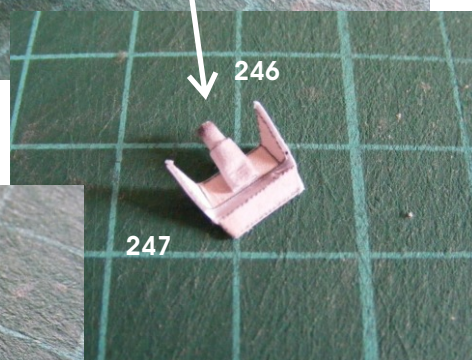

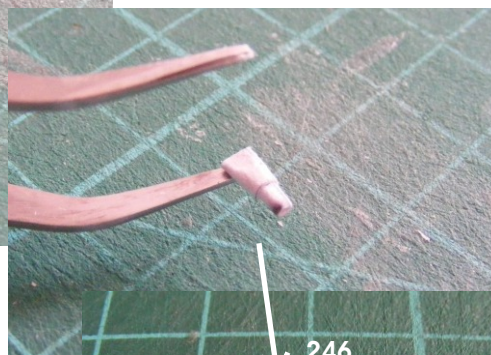

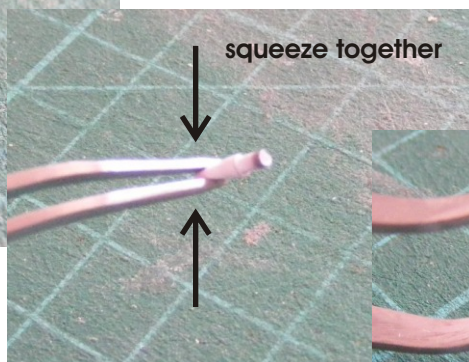

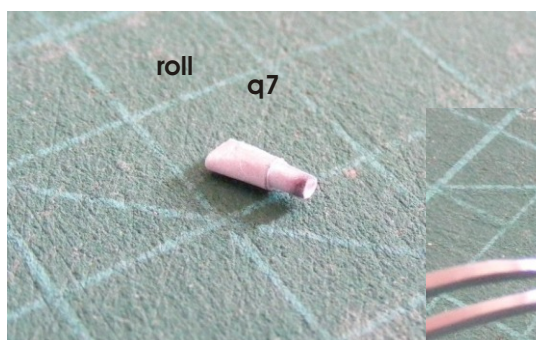

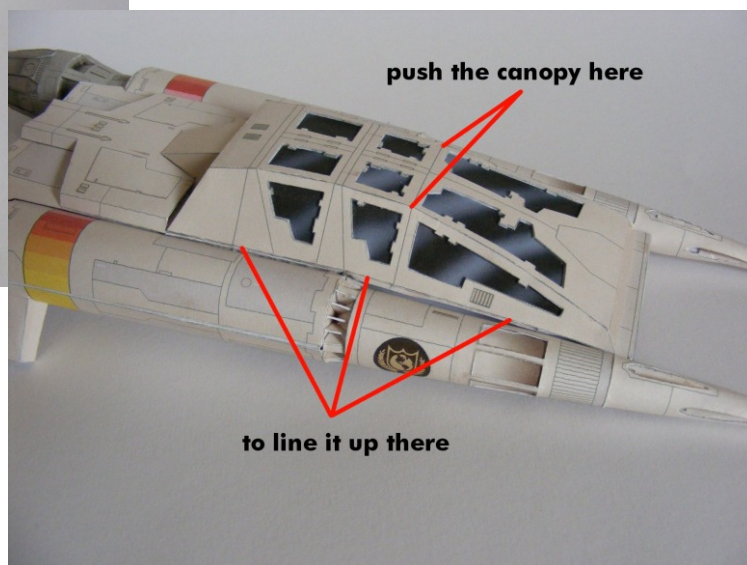

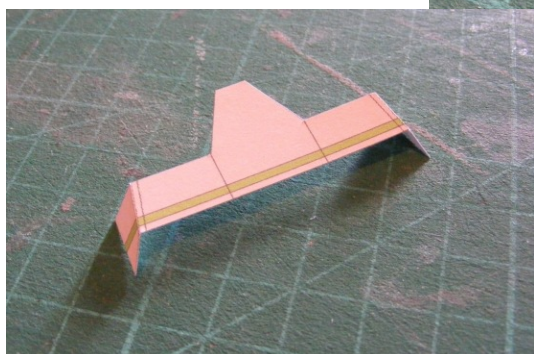

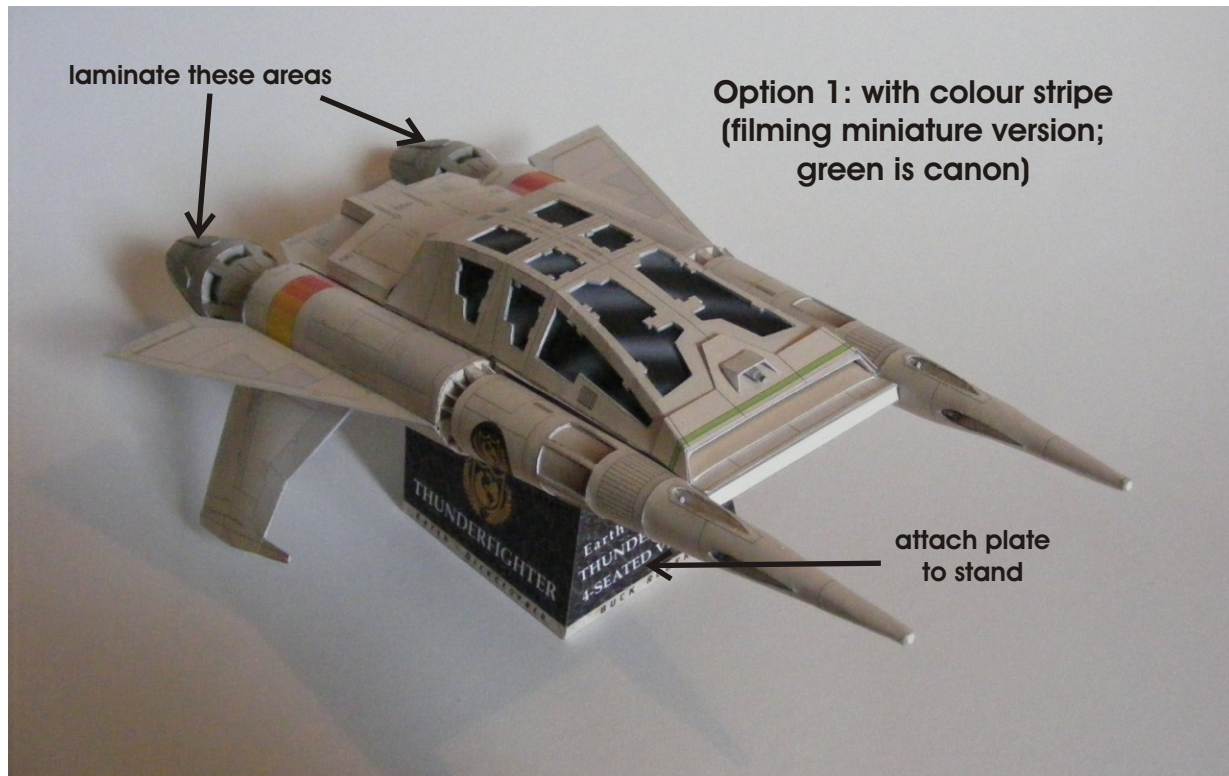

Choose a colour stripe  
which you like best.

Option 2: without colour stripe  
(Searcher mock-up version)

### Option 3: Blue quad from the episode “Twiki Is Missing”:
